

Project Development Phase Delivery of Sprint - 1

Date	26 October 2022
Team ID	PNT2022TMID01193
Project Name	AI-Based Discourse for Banking Industry

Create IBM Service

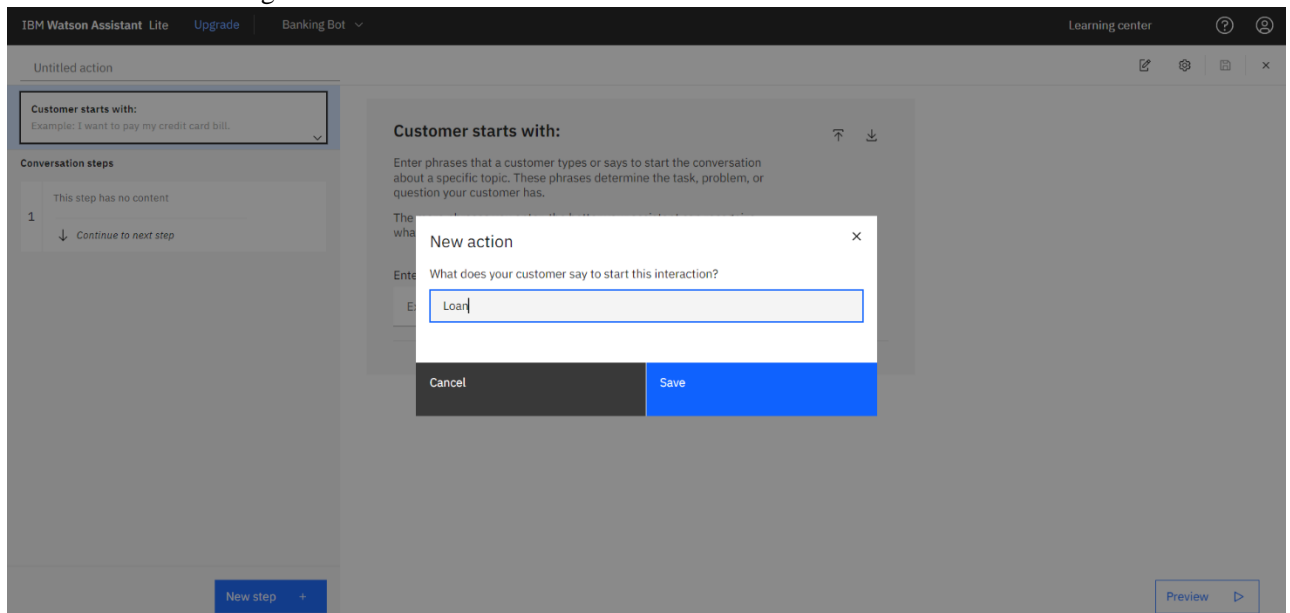

In this activity, you will be creating the Necessary IBM service. The following are the service that you have to create.

- Watson Assistant

Creating Skills & Assistant For Chatbot

Skills are nothing but actions and steps. Steps are the subset of actions where conversations are built and Assistant is used to integrate skills.

A default template chatbot is created. Need to add actions.

The screenshot shows the IBM Watson Assistant interface. A modal dialog titled "Create a new assistant" is open. It contains the following fields and options:

- Assistant name:** A text input field containing "Banking Bot". Below it, a note states: "Your assistant name will be kept internally and not visible to your customers".
- Description (optional):** A text area with a character count of 0/128. The placeholder text is "Add a description for this assistant".
- Assistant language:** A dropdown menu currently set to "English (US)". Below it, a note states: "This is the language your assistant will speak."
- Buttons:** "Cancel" and "Create assistant".

In the background, the "Task tracker" shows three steps: "Enhance your assistant" (100%), "Test and refine your assistant" (50%), and "Deploy your assistant" (50%). The right sidebar shows "Resolution Methods", "Content" (with "No version assigned yet"), and "Extensions" (including a "Search" extension powered by IBM Watson Discovery).

Note: No code for this project. So, I attached the screenshot and step to build it.
